The information provided herein is for guidance purposes only and does not replace the information provided or interpretations made by the competent authorities on each matter.

# Noteworthy Decrees and Resolutions

FEBRUARY 2025

Resolution No. 2, of 2025,  
issued by the National  
Cybersecurity Agency

Authorizes the public disclosure of early alerts, notices, and  
information on cybersecurity risks and incidents

**SUBJECT**

Cybersecurity

**PUBLICATION DATE**

February 12, 2025

This resolution aims to mandate the public disclosure of cybersecurity vulnerability alerts issued by the National Computer Security Incident Response Team, in accordance with the provisions of Cybersecurity Framework Law No. 21.663.

Through this resolution, the National Computer Security Incident Response Team is authorized to disclose information on specific threats and vulnerabilities, as well as the measures that should be taken to protect network and information technology system infrastructure.

The alerts will be classified into different categories, including spoofing alerts, incident alerts, indicators of compromise, and vulnerability alerts.

In addition to the alerts, notices and technical reports will be published, such as manuals, guides, monthly or annual reports on statistical information, and other types of technical information that is disclosed.

Disclosure channels will include the media outlets used by the National Cybersecurity Agency, including its website, the National Computer Security Incident Response Team's website, and institutional social media accounts.

It is important to note that the authorization for public disclosure only includes the precise information contained in the alert, and does not include the background and reasons that led to its issuance, unless the national director of the National Cybersecurity Agency explicitly authorizes its disclosure.
